KO'OLAU DISTILLERY HAND SANITIZER

FDA-approved, locally-produced hand sanitizer.

KO'OLAU DISTILLERY'S hand sanitizer is produced according to the World Health Organization's protocol for production of ethyl alcohol-based hand sanitizer.

Per FDA and WHO guidelines, our hand sanitizer is comprised of the following concentrations of three ingredients: denatured 95% ethanol diluted to 80%v/v with water, 3% Hydrogen Peroxide @ 0.125%v/v, and 98% Glycerol @ 1.45%v/v.

At 80% ethyl alcohol, the WHO formula KOOLAU hand sanitizer is a high-quality product that has been independently laboratory tested and far exceeds the germ-killing qualities of other products that use 70% alcohol. It is most effectively used as a spray that is allowed to fully evaporate on the skin.

KO'OLAU DISTILLERY is selling in the following quantities;

1 Gallon (128oz) Bottle	\$29.99	
500ml (16oz) Spray bottle	\$9.99	*MOQ 100@ \$8.99 each
20ml (2oz) Spray bottle	\$2.99	*MOQ 1000@ \$2.50 each

For purchasing contact Ian Brooks at ian@koolaudistillery.com or for questions regarding purchasing call 808-721-6103. WHO testing of samples produced according to this formula demonstrated stability within optimal quality parameters in excess of 18 months in a tropical climate without air conditioning.
